

Emtec – Ball Burst Tester

BBT

Measuring Instrument
for the Measurement of the Ball Burst Strength
according to DIN EN ISO 12625-9

Main Application

- base tissue
- tissue handkerchiefs
- tissue (kitchen) towels
- toilet tissue
- facial tissue
- nonwovens (cross-laid fibers)

Main User

- Manufacturers of Tissue and Nonwovens
- Converters of Tissue and Nonwovens
- Chemical Suppliers
- Machine builder

Upgrade to TSA – Tissue Softness Analyzer possible.

Advantages

menu-driven measurement
integrated measurement of ambient temperature and humidity
easy handling
robust construction
objective measuring method, free from subjective influences
high reproducibility of the results

PC Software

very user-friendly and easy to operate
easy handling in quality assurance

Technical data

sample dimension: \varnothing 112.8 mm
dimension of device: 440x190x470 mm (H x W x D)
weight: 19 kg
power supply: 230V, 50Hz / 115V, 60Hz
